

remoLive

REMOTE ASSISTANCE IN MOBILITY

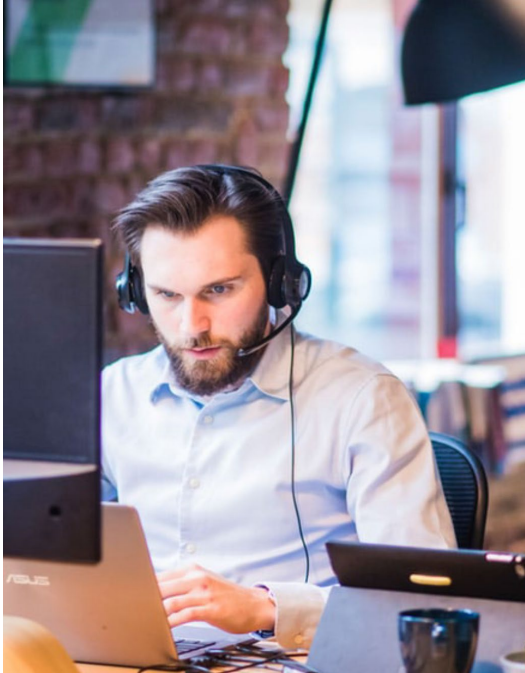

SEAVISION

remoLive

RemoLive, supported by the application Acty, can establish a direct and rapid communication through a **video call**, by means of mobile devices.

It will be enough to **frame the system** or any external devices and show the real time image to the technician. You can also maximize the interaction through **Augmented Reality** tools.

Remolive is part of the remote assistance family.

What if you can push a button on your HMI Interface and request remote assistance from SEA Vision Headquarter Service Center, anywhere and **24/7**?

RemoNow and **RemoLive** are two services of assistance thanks to which the Service Team of SEA Vision can perform **remote diagnosis** and interact on your systems to solve any issue in **real time**.

Main Advantages:

- DIRECT CONNECTION
- INTERACTION IN REAL TIME
- 24/7 ASSISTANCE
- SAVE TIME AND MONEY
- SAFETY AND COMPLIANCE
